

# "Honey, I'm Going Outside To Unload Three Tons Of Gravel By Hand. Be Back In 30 Seconds."

EZ Dumper dump trailers and dump inserts for pickup trucks are hydraulically powered. Just push the button on the remote control and the bed raises to an angle of 47° in under 30 seconds for quick and clean unloading.

Our dump trailers for homeowners and small contractors pull behind just about every car on the market. Use them to haul 50 sheets of plywood. Or up to 4.5 cubic yards of mulch. Or up to five tons of crushed stone. Our dump trailers double as equipment haulers, too, perfect for those occasions when you need to take your riding mower, personal water craft or other toy in for a service.

The EZ Dumper dump insert is the most popular dump insert in North America, with more than 90% of the market. It bolts into most pickup trucks in one hour with no alterations. It runs off your truck battery from a simple remote control that you install on your dash. It will likely outlive your pickup truck.
